

REMARKS

The Examiner has objected to the drawings because they fail to show the exploded view showing the screen 16 displaced along the light axis as described in the specification. Applicant submits herewith a copy of Figure 2 with proposed changes shown in red and a clean replacement sheet of Figure 2. Figure 2 now shows the screen displaced along the light axis as described.

The Examiner has then objected to the specification due to informalities. Applicant has amended the specification as suggested by the Examiner to fully respond to the Examiner's objection. More specifically,

- a) Page 3, Paragraph 4, line 3-4 has been amended to read "and a lower open end";
- b) Page 4, Paragraph 3, line 1 has been amended to read "Provided next is a cylindrical cover";
- c) Page 12, Paragraph 3, Line 2 has been amended to read "sufficiently robust"; and
- d) Page 13, Paragraph 3, line 11 has been amended to read "night".

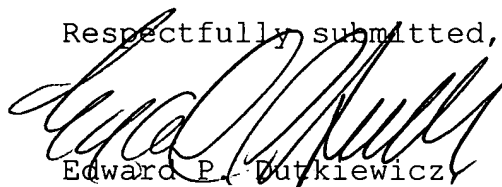

The Examiner has objected to Claim 1 for formalities. Claim 1 has been amended herein to remove the objectionable reference numeral "10" in the first line of the claim. Note is taken that the Examiner has found Claim 1 free of the art.

The Examiner has then rejected Claims 2 - 4. These claims have been canceled herein.

The Applicant submits that the amendments herein overcome all grounds of objection and rejection and place this application in condition for allowance.

Reconsideration and a Notice of Allowance are requested.

Respectfully submitted,

Edward P. Dutkiewicz
